

Congress is [currently discussing the reauthorization of the Elementary and Secondary Education Act](#), which includes the 21st Century Community Learning Center program.

As [the largest funding source for afterschool programs in New York](#), losing the 21st Century programs would drastically decrease access to afterschool. 60,000 children would lose their programs.

We need your help to urge members of Congress to make investments in our children and support afterschool programs. It only takes a second to tweet or post on Facebook to #Invest3to6, so be sure to use some of the sample tweets and posts below!
